

**DALARNA
SCIENCE
PARK**

LETTER OF SUPPORT

Dalarna Science Park is a regional science park with the mission to promote regional growth and development. Our aim is to contribute to the regional competitiveness and innovation capacity. From our experience we know that close cooperation between sports, health, sustainability and business is an important factor in this respect. The FIS World Ski Championships has earlier proven to create many positive side-effects for businesses. To host the World Ski Championships in 2027 would be of vital importance for the region in the view of attraction and enforced sustainable development.

With this background, Dalarna Science Park express our full support to the Swedish Ski Association application to host the World Ski Championships in 2021.

Kind regards,

Dalarna Science Park

Angelica Ekholm,

CEO
